

How we translate Buddhist articles

From Chinese source to English reader

with a little help from AI

MPI Translation Project · omp

What is omp?

“omp” stands for **Oh My Pi**.

What is omp?

“omp” stands for **Oh My Pi**.

Think of it as a shared workspace where AI assistants help us with careful, repetitive work.

What is omp?

“omp” stands for **Oh My Pi**.

Think of it as a shared workspace where AI assistants help us with careful, repetitive work.

- We give the AI our rules, our files, and our style guide.
- It follows the same process every time.
- We stay in charge: AI drafts, humans review.

What we have translated so far

Our library holds **14 article projects** on Buddhist and Dharma topics.

What we have translated so far

Our library holds **14 article projects** on Buddhist and Dharma topics.

So far, **2 articles** are fully translated:

What we have translated so far

Our library holds **14 article projects** on Buddhist and Dharma topics.

So far, **2 articles** are fully translated:

- **What do we rely on to understand the world?**
- **12-Minute Mindful Ball Guidance**

What we have translated so far

Our library holds **14 article projects** on Buddhist and Dharma topics.

So far, **2 articles** are fully translated:

- **What do we rely on to understand the world?**
- **12-Minute Mindful Ball Guidance**

More articles are in progress, covering mindfulness, life questions, gratitude, end-of-life care, and Dharma in management.

Our specialized helpers

Inside omp, we keep special guidebooks called **skills**. They teach the AI how to do each task.

How to look up Buddhist terms in our database

Other helpers

Clean up text, translate slides, convert documents

Step 1: Receiving the article

An article usually arrives as a Word document or a plain text file.

Step 1: Receiving the article

An article usually arrives as a Word document or a plain text file.

We clean it up and prepare a master Chinese file called `source.dj`.

Step 1: Receiving the article

An article usually arrives as a Word document or a plain text file.

We clean it up and prepare a master Chinese file called `source.dj`.

This master copy becomes the original that every later step checks against.

Step 2: First draft

The AI reads the Chinese line by line.

Step 2: First draft

The AI reads the Chinese line by line.

It looks up key Buddhist terms in our database so names and ideas stay consistent.

Step 2: First draft

The AI reads the Chinese line by line.

It looks up key Buddhist terms in our database so names and ideas stay consistent.

Then it writes a first English draft, called `target.dj`, with one English line for every Chinese line.

Step 3: Self-review

A second AI checks the English draft against the original Chinese.

Step 3: Self-review

A second AI checks the English draft against the original Chinese.

It looks for:

Step 3: Self-review

A second AI checks the English draft against the original Chinese.

It looks for:

- missing sentences or paragraphs
- awkward English
- Buddhist terms used differently from before
- anything that changes the meaning

Step 3: Self-review

A second AI checks the English draft against the original Chinese.

It looks for:

- missing sentences or paragraphs
- awkward English
- Buddhist terms used differently from before
- anything that changes the meaning

It edits the English directly, and we check the line counts match.

Step 4: Human review

Now we read the Chinese and English side by side.

Step 4: Human review

Now we read the Chinese and English side by side.

translation

We approve the draft or flag problems for the AI to fix. This step may repeat several times until the text feels right.

Step 5: Review by others

When the translation is clean, we send it to volunteers or editors.

Step 5: Review by others

When the translation is clean, we send it to volunteers or editors.

They read it with fresh eyes.

Step 5: Review by others

When the translation is clean, we send it to volunteers or editors.

They read it with fresh eyes.

Once they approve, the article is ready for the next step: typesetting or publishing.

The whole journey

1. Receive the article
2. Draft the translation
3. Self-review
4. Human review
5. Review by others
6. Publish

AI helps at the first three stages; humans lead the last two.

Any questions?

We would love to hear from you.

Ask about the workflow, the AI, or how you can help review translations.

Thank you

Thank you for listening.
